

## Barb and Rex Wickes TESTIMONIAL

**In April of 2004 we were to open our garden with Australia's Open Garden Scheme and a couple of months prior to this I felt the garden was not growing the way I had anticipated so I began the Plant of Health program of fertilizing. Triple Boost, Plant Care, Silica and Seaweed were used as directed and it was amazing to see the results. By the time the garden opened it was looking the best it had ever looked – growth incredible and the flowering great. We had wonderful comments from visitors. I thoroughly recommend all the Plant of Health products.**

*Footnote:- Barb Wickes is a true collector of plants and has one of the best gardens I have ever seen. She is a member of the Horticultural Media Association of Queensland, serves on the committee of the Perennial Poppies Garden Club and has presented garden and herb cooking demonstrations at major expos. She is a woman with a true passion for gardens and nature.*
